Dear sirs,

I am reporting an organized crime gang in Denia, Alicante who are terrorizing the townsfolk by singling out people to target for intimidation and abuse and possibly financial crime too. I have experienced gender violence from them, including cyber bullying, and they have hacked into my computers and phones and webcams too.

I have evidence for this on my laptop, phone, and webcams, but the I am in the position where I have to gather it myself, including pay high prices for tech analysis.

When the gang tried to chase me away from Denia in June last year, I refused to flee and the intimidation got worse. They made it very clear to me they had access to my technology in August 2023 and as I am an IT professional myself, and the attack was so professional, I assumed they must have paid someone to hack me. I did not realize at the time they had been quietly watching me for over a year already, maybe more.

I understand that the police have little interest in pursuing such intimidation cases, as historically it is impossible to gather evidence against gangs like this who target women, and the townsfolk are too scared to talk.

However, this particular gang in Denia Alicante has recently become technologically advanced, and they are now pursuing their victims via social media. They are also hacking their victims' home networks and phones, initially by entering through vulnerable routers from handheld devices outside, or maybe even through friends working at the IPs, and thereby gaining full access to people's online activity. Their victims appear to be no longer just women either.

Gathering evidence for this organized criminal activity should be easy, and should not be left to a single victim who dares speak up. I have been to the police twice now about the bullying. Denia police sent me away and did not record my visit after a violent threat on Twitter. Madrid police took a statement but will not be investigating. I have to take my laptop and phone to a perito for a professional analysis which will cost me upwards of EUR 1000 at which point I will amplify my complaint.

This gang has targeted me probably since at least June 2022 when I moved back to Denia and signed up for piano study at the conservatory again, and by doing so insulted the piano teacher Domingo Lopez Cano who threatened to poison me for refusing his advances in 2014.

Extremely private photos, videos, and recordings of me have been disseminated throughout the town, and people I don't know either laugh at me when they see me, or look away uneasily.

They have suggested online that they are also behind recent suicides in the town, of which, in recent times, there are far too many for such a small area, and one of these includes an old friend of mine Lorraine Blackburn who was apparently terrorized by macho male violence which led her to kill herself.

I have been very clear with people that I will never kill myself so if anything happens to me it is suspicious.

These people are out of control now and something needs to be done.

It should be easy to gather online evidence from this gang once you have ascertained who the technology advanced members of it are. I expect a quick scan of databases should help.

The people I am aware of are:

Domingo Lopez Cano and his sister Carmen, their family and associates -> who appear to be well-known criminals in the area.

Vidal Sastre Sanchez Hornero and his associates.

The technician at the conservatory David.

They have implicated many more (teachers, staff, and students) at the conservatory by being bold enough to share extremely private health information with them about me that I have told no one at all, only Google.

Everyone knows everything about me, including how much I am paid, who I make donations to, how much those donations are, and when I make them. No-one should know these things.

I have been unable to access my Coinbase account are an extremely horrible attack by the conservatory and the people of Denia a few weeks ago. I believe they have access. I have over 70K EUR in there that they may have access to. I am trying to get access again.

As I said, it was clear by the fact that everyone knows what is happening to me and is either enjoying it or unable to reach out to help me, that this is a sadly common event in Denia, and perhaps further afield too.

However, this gang are now totally out of control, and need to be stopped, I am in the process of contacting the Europol criminal cyber gang investigators.

I enclose some information; the denunciation I made in Madrid, and the amplification I will be making once I get some evidence from my laptop.

I have numerous letters I wrote to the Generalitat which catalog my experiences and complain about the treatment coming from one of a macho teacher and my concerns about his closeness with young girls and the access he has to their phones. These letters were totally ignored and sending them put me in more danger at the conservatory and in the streets of Denia.

I won't stop trying to do the right thing. You have to help me stop technology-advanced misogynist gangs terrorizing the good people of Spain and forcing victims to flee from our homes in fear of our lives.

Faithfully,
