

# DARE TO BE HONEST.

**4th July vote Katharine  
Margaret Murphy  
Finchley & Golders Green**

**In Britain 2024, it has become an  
act of defiance to say these words:**

**No woman has a penis**

**No man has a vagina**

**There's no such thing as "non binary"**

**"Transitioning" children is abuse**

---

**Our schools, police, NHS, councils,  
government have forgotten what a woman is.  
Let's make the truth sayable again.**

Election Communication

## **Our concerns:**

- Men who claim to be women are in female-only spaces.
- Children are being indoctrinated into this nonsensical ideology at school in PSHE, as well as the entire curriculum.
- Female language is being erased and diluted. The NHS refers to birthing persons, chest feeders, cervix havers, menstruators or vagina havers.
- Women's sport is being given away to mediocre men who pretend to be us.
- Women are not able to speak freely about our concerns in our places of work, within the NHS, to our children's schools, and in all areas of our public and private life without fear of intimidation or punishment.
- Single-sex spaces and services are vanishing in care, hospitals, and schools, and even on Girl Guides residential trips!

## **Our solutions:**

- Repeal the Gender Recognition Act 2004. This act created the legal fiction that allows men to be recognised as women.
- Remove the protected characteristic of "gender reassignment" in the Equality Act. This is often used to discriminate against women.
- Restore all government institutions and services to reality based, impartial and professional establishments.
