Hi there,

I want you to know why I won't be coming back to TT and it may or may not surprise you.

Since October 2024, and earlier (2007), I have survived multiple serious attempts at murder by poisoning - I'm told 7 times, I think it's probably more. This has made me somewhat famous in certain circles, but not for good reasons.

These murder attempts were mostly carried out in Spain by the gitano porn gangs who wanted me to leave my spy-cam sex-slave apartment where I had been sedated and raped probably two or three times a week since I moved in in Feb 2022 and where they made me famous in porn. (And also in 2013-2016 in another apartment, and previously in 2006-2009 in another apartment in the same town!)

I am so famous in sedated rape porn, men recognize me in the street all over the world, and even my dad and brother took part in some! It's horrific I know. Thousands of men have raped me without my knowledge since 1989 when I was put in porn by the rape gangs of North London: [2015 - Fear & Loathing in Las Marinas](#) .. my dad even brought my mother to the town the following year and she ended up in A&E with a panic attack.

The town Denia is well known to be a criminal porn centre, and they target mainly British and Irish women for a very sick and sinister reason, and they have been doing it for so long, their appetites have grown out of all proportions and they now even procure babies (pregnancy porn and baby-rape). A yoga teacher I know from London went through exactly the same thing I did, with the same people, and they got a baby out of her: [2015 - Fear & Loathing in Las Marinas](#). The networks supplying the town with women are becoming uncovered now.

Something about Denia has meant it is totally untouchable... and no-one will help the women, children, and babies being targeted there, many of whom end up murdered.

As well as the constant attacks on my person, I have suffered carefully applied brain damaging from poisoning in my water/food/toiletries over many decades so that I have a stroke-like symptom whereby I cannot recognize objects out of context. This was so I could star in what they call "switcheroo" porn at the music school in Spain where I was studying the piano. All this was going on while I was attending TT classes in Ireland. [Vidal Sastre Sanchez Hornero - Fear & Loathing in Las Marinas](#) As you can see, I'm remembering everything.

The brain-damage poisoning has left me with significant cognitive loss, including inability to play chess (I used to be excellent), learn new things, recognize people, etc. I have coordination issues and no doubt other symptoms that no-one cares to do anything about.

Whenever I tried to get help about these horrors - police, embassies, doctors, press, TT practitioners - everyone has been utterly indifferent, including Steve, and **THIS** hasn't made any sense at all. People have even told me to **SHUT UP** as I begin trying to talk about all this, trying to get help. It's extraordinary.

I started to realize people only do that when they're somehow complicit, and since October 2024 I don't really meet anyone who isn't a spy. They've been all over me like scabies since then.

I thought it was because they were helping me with the criminal investigations, and they set up numerous "events" which were intended to support this view. But they don't care at all. They were after my eggs... Just like the porn gangs were after my rape victimhood... Everything done while sedated. It's utterly horrific.

Anyway, everyone heard about my "abilities" (not getting harmed when seriously poisoned, a biblical thing it appears), and instead of helping me get out of my horrible situation, they decided they would steal eggs from me for trophies. I think this has happened four or five times since July 2025 as I roam around the world homeless essentially, hoping someone will help us, and no-one helping.

So, as well as repeated poisoning, I have endured numerous sedated surgeries and have the internal injuries to prove it - no, they did not take care while repeatedly doing keyhole surgeries. I have a hip/groin injury which I believe is a torn suture after no recovery periods and continued activity. I also have a rib fracture injury which keeps opening.. I realize from heavy men leaning and pressing on me repeatedly - also happening after surgery times. And I have a similarly inexplicable wrist injury.

I realize that TT is fundamentally a CIA operation fielding and managing "intuitives", and I have been on the "company's" books working "undercover" as it were in Spain since 2006 because these gitano gangs are major enemies of UK and America, and I was in the thick of them.

And everyone hacks each other. So I've been in the middle of it all since then and everything the gangs did to me was a finger up to American and British governments who can't do anything about them for an extraordinarily sinister reason.

Furthermore, these gangs have been picking off British and Irish women for decades because of this, and murdering them and I have lists and even photos of them that I tried to tell the police about: [August - Fear & Loathing in Las Marinas](#)

I had a friend in Denia who was helping me too, without my knowledge. They took him to Israel after I survived poisoning in July 2025: [July - Fear & Loathing in Las Marinas](#) It turns out, he survives poisoning too. It turns out, Steve does not survive poisoning in the same way we do, but he was expected to. There have been others like us, usually murdered.

So it appears the Spanish knew exactly who and what I was - I didn't - and acted accordingly - put me in sedated rape porn three or four times a week since 2022, and earlier, and even set up a situation where I would be sedated and raped by my male colleagues in Bali at a work event in May 2024: [May - Fear & Loathing in Las Marinas](#) where Elon Musk turned up. I kid you not.

Perhaps all this is hard to believe and I accept that. When you're being sedated continuously for evil purposes it's nearly impossible to know what's really going on so people can actually do whatever they like. And if they're evil, they will.

Ironically, my memories of events under sedation have been steadily coming back, and I expect it all will eventually - including surgery in July 2026: [July - Fear & Loathing in Las Marinas](#) at the CIA torture chamber they set up for me in Bali. A horrific experience! Something I expect Steve has been through previously many years ago.

I have been writing my story down because no-one was interested in it, so everything I have just told you is in here: [Summary - Fear & Loathing in Las Marinas](#) and sooner or later someone is going to sit up and pay attention.

A list of content/evidence you might find interesting:

The multiple men posing as music teachers for the switcheroo porn who I have now remembered -> [Vidal Sastre Sanchez Hornero - Fear & Loathing in Las Marinas](#) (I thought there was only 1 man for years).

The clandestine surgeries: [Egg theft - Fear & Loathing in Las Marinas](#)

First poisoning attempt in 2007: [2007 - Fear & Loathing in Las Marinas](#)

Second (possibly later): [October - Fear & Loathing in Las Marinas](#)

Poisoning in Lourdes: [July - Fear & Loathing in Las Marinas](#)

But click about and you'll see what's going on pretty quickly. Some of you are in here.

Steve is ready to throw me under the bus... you know, the usual, mad woman let's put her in the attic etc. but he knows. You could ask him about Kathleen Love: [2020 - Fear & Loathing in Las Marinas](#)

Anyway, this is why you won't see me again. So you could take me off your lists and ask "Heather" to do the same. I know she's missing me already.

With the very best,

Katharine
