Hi Julie & Harriet,

I've written to you both a lot over the years.. but I get the feeling those emails were blocked by the porn-gangs (Adams mainly in North London) who have been hacking and controlling my online/phone activity since 2001, or earlier.

When I wrote to you probably in 2020 and earlier, I was only aware of the Tottenham rape-gangs putting me in sedated rape-porn in the 80s - distributed globally by Adams, making a star of me!

Now, I know much more of what I have endured while unconscious over the last four decades. I have been sedated and raped by thousands of men, all of it available in the porn record.

A non-exhaustive list of perpetrators:

- Tottenham rape-gangs and their pals (including Yorkshire Pakistanis).
- Boyfriends - non-serious and serious ones.
- Family members, including brother and father.
- Yoga teacher and others no doubt in India.
- Male friends and even old school friends who found out how famous I was in sedated rape-porn and thought they'd have a go too.
- My colleagues in tech -> this is likely the most egregious and disturbing set of perps as all of them are "apparently" normal men with families, jobs, children, and normal lives and they were happy to sedate and rape me repeatedly on a works conference in Bali in 2024: [May - Fear & Loathing in Las Marinas](#)
- Gitano honey-trap porn-gangs of Spain who lured me to three spy-cammed apartments since 2006, and live-streamed sedated rape events (they have some sedating gas tech they use on women after we've gone to bed) probably three or four times a week.
- They also brain-damaged me for the (very famous with the British police) horse porn (which was their end goal, didn't happen) and undoubtedly planned to finish me off with snuff.
- Famous men, including Elon Musk. I kid you not.

Please take another look. I'm trying to write it up as much as I know: [Summary - Fear & Loathing in Las Marinas](#)

Of course I've been to the police countless times, in Spain and London, to embassies, newspapers, everywhere, trying to get help. No-one cares or the establishment comes down on them and silences them.

I was run through a very well-oiled porn-production machine that requires constant victims that will end up murdered. There's isn't a chance in hell I'm the only one. In Spain, porn-audiences are now requesting famous women they want to see in porn for the porn-gangs to target, drug, attack or blackmail, and film. We must be thousands of thousands. I believe sedated rape porn is epidemic and totally normalized by men since the 80s.

I have information from an insider about multiple foreign murder victims for criminal porn produced in Spain, many of them British. No-one cares about us. Why?

The deathly silence from the authorities as I remember events, including the switcheroo porn team at the music school in Spain (yes, children were in the classes while I was being sedated, raped, and livestreamed) [Vidal Sastre Sanchez Hornero - Fear & Loathing in Las Marinas](#) suggests to me that nothing in what I have said is untrue or I would have been sued already.

They don't want the info public.

I stood with Posey Parker's party in N2 in 2024 and I know she gives you a hard time, but the establishment came down hard on her about me too. Total silence from all of them.

Whatever's going on politically needs put to one side - I don't care about it at all - so that we can focus on the sedated rape-porn epidemic and the fact it's formally made it's way into schools in Spain (trans epidemic a parallel in schools in the UK) and men around the world are supporting this and industrial-scale baby rape with their apparently normal and healthy porn subscriptions.

Please have a look.

Thank you.

Katharine

[Summary - Fear & Loathing in Las Marinas](#)

p.s. I just re-read your Guardian article about Dworkin Julie, and regardless of what you do with the information my experience is really something you NEED TO KNOW ABOUT!

p.p.s. I found a trauma therapy that worked, and God too, so I'm (since 2023) without PTSD or any of the ill effects of sexual violence; an essential part of being able to tell my story.
